"IF IT IS A STOCK SIGN, WE HAVE IT."

BRONZE

THE METAL EVERLASTING

The hardness and resistance to oxidation of bronze fit it admirably for sign work. Many ancient bronze coins have come to us but little deteriorated, though buried for ages in damp soil, or immersed in water.

Cast Bronze Tablets, Plaques, Name Plates, etc., never deteriorate. They will never wear out.

SEE PAGE THIRTY-THREE.

BRASS

Second only to cast bronze.

ENGRAVED BRASS signs, because of their highly polished surfaces, demand attention.

LETTERS DEEP CUT FOR LONG LIFE.

See Pages thirty and thirty-one.

A Message to You—

Read Carefully Before Ordering

SERVICE

Since 1882, when this firm was established, we have attempted to give efficient service, but the utmost in efficiency cannot be had unless you co-operate with us.

By observing the following suggestions you will help us to ship your orders promptly.

CREDIT

We are always willing to open regular charge accounts with our customers who are properly rated in Dun or Bradstreet.

If not rated, we suggest that you send us the names of three or four firms (Chicago preferred) from whom you are buying on open account. Sometimes several days are required to obtain reports, so we suggest that you remit with your first order.

TERMS

Our terms on charge accounts are net—NO CASH DISCOUNTS. Charge accounts must be paid on or before the tenth of the month following the day of invoicing unless an extension has been granted. We do not wish to be harsh or arbitrary in the matter of credits, but we must protect ourselves against loss.

REMITTANCES

As it is necessary to delay orders until personal checks can be cleared unless the payer is known to us, we suggest, to avoid this delay, that remittances be made by money orders or cashiers' checks. U. S. postage stamps are acceptable for any amount.

PARCEL POST

Orders must be shipped by express unless your remittance is sufficient to defray the postage charges. If any balance remains, it will be refunded with our invoice.

C. O. D.

Orders for stock signs and letters cannot be shipped C. O. D. unless a remittance equal to twice the transportation charges is included with your order to protect us against loss should the shipment be refused.

CLAIMS FOR LOSS OR DAMAGE

Examine your order immediately on arrival. Check the various items against our invoice. Every order is checked twice before it is shipped.

Parcel post packages may be insured at the regular postal rates if requested. Our responsibility ceases when the package is delivered to the transportation company and claims for loss or damage should be filed with them.

PRICES

We cannot control all of the factors entering into the manufacture of the merchandise listed in this catalogue consequently prices are subject to change without notice.

It is a good plan to state the prices you expect to pay so that if there has been a price change since this catalogue was issued, we will not have

to delay your order until we can obtain a price acceptance. If the prices have declined you will be billed at the new price and the balance due you will be refunded with our invoice.

SPECIAL SIGNS AND LETTERS

We cannot accept orders for signs or letters when credit has not been established until a deposit of 33 1-3% has been made.

GUARANTEE

Our merchandise is guaranteed to be exactly as represented.

DELIVERY

Orders for stock signs and letters are generally shipped the same day they are received, but as the last mail is not delivered until 3:00 o'clock, it is sometimes necessary to hold orders until the following day. We will avoid even this delay if at all possible.

CREDIT AND EXCHANGE

Stock signs and letters, if received in proper condition so that they may be placed in stock for resale, with the exception of stencil letters and figures and letter and figure patterns, may be returned for credit or exchanged.

SIGNS AND LETTERS THAT HAVE BEEN MADE TO ORDER CANNOT BE EXCHANGED OR RETURNED FOR CREDIT.

EXPRESS PACKAGES MUST BE PREPAID

We cannot accept merchandise returned for credit or exchange if the transportation has not been prepaid.

IMPORTANT SUGGESTIONS

Before mailing your order check the style number, styles, description, colors, spelling and quantities.

We suggest the following form for ordering:
JOHN JONES—9, six inch plain convex gold glass letters, style 42.

RESTAURANT—10, eight inch ornamental, convex gold glass letters, style 43.

The inscriptions of name plates and signs should be printed.

SIZES OF LETTERS

The sizes of the letters on special signs and name plates that are to be made to order should be indicated unless you desire to leave the layout to our judgment. We will follow your instructions as closely as possible.

Print Your Name and Address

SAMPLES

Samples will be charged for at the regular price. They may be returned at any time for full credit unless made to order. Express or parcel post charges to us must be prepaid.

TELEGRAMS

Telegrams sent "Collect" cannot be accepted. If the cause of the telegram arises through any fault of ours, we will reimburse you.

WHITE ENAMELED LETTERS

Vitreous Enamel Fused To Copper Base

Enameled letters were first marketed in 1882 and were looked upon as a novelty at that time. They have steadily increased in popularity until it is impossible to walk down a business street in any city without seeing many different styles of them.

We are proud of the fact that there is at least one sign of our enamel letters within a "Stone's Throw" of every street car intersection in Chicago.

White enameled letters, because of their pure white finish, are more legible than any other style. Because of their very hard surface they stay clean and bright for many years. Some of our signs have been in use for more than thirty years. Anyone can cement them to glass, stone, brick or any hard surface.

BOARD SIGNS lettered with enameled letters do not require repainting as often as painted signs. Sign painters can give their customers greater satisfaction by using enameled letters on their board signs.

Enameled letters are easily attached by any one.

Complete instructions are included in every shipment.

STYLE NO. 2. REGULAR STYLE

SPECIAL STYLES OF ENAMELED LETTERS

Enamelled on Copper

The appearance of a window sign can be greatly enhanced by the use of any of the following styles of white enameled letters. The use of these letters adds a distinction to a sign not obtained by using only the plain block style.

Although these styles are not carried in stock, they can be made to order from our standard patterns and shipped in a few days.

TRADE EMBLEMS

Enameled Copper

Trade emblems such as illustrated below can be made to order in colors in quantities of ONE or more. Some of the well known trade marks that have become popular by the use of trade emblems are, "Teley Teas," "Salada Teas," "Cats Paw Rubber heels," "Sargent Locks," "Gorton's Cod-Fish," "Easterbrook Pens," etc.

Dealers in staple commodities can often obtain window signs free of charge by writing to us. We will explain the advantages to the manufacturers who are almost always eager to grasp the opportunity of obtaining window space without cost.

Tooth, Style 13

Set of Teeth, Style 13A

Shoe, Style 19-A

Eagle and Shield
Style 17

Enameled copper emblems can be made in any design or trade-mark. The above illustrations can only give a poor idea of the wide latitude that may be had.

We appreciate opportunities to quote. State quantities, size, and colors and send a copy of your design.

COFFEE CUP Enameled Copper

Style 20

These Coffee Cups when used with any of the various styles of enamel letters add a distinctive touch to the complete sign. The slogan, "Delicious Coffee" tells an entire story at a single glance. Everyone knows that a cup of good coffee "Peps" up a tired person such as nothing else will.

Size 8x5 inches each \$1.25
Cement for attaching .16
Shipping weight 2 lbs.

PERCOLATOR

Enameled Copper

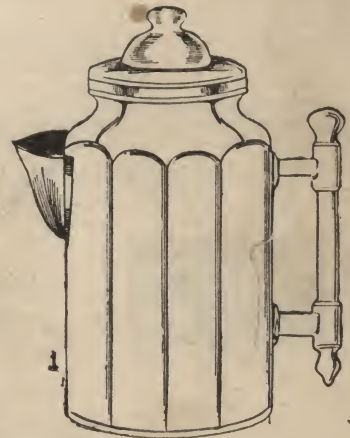

A Percolator cemented to the window of a lunch room or restaurant reminds the pedestrian that he can obtain a refreshing cup of coffee inside.

The appearance afforded by the blue shading against the white enamel is very attractive.

Size without lettering, each 8"x11" \$3.00

With one or two lines of lettering 5.00
Cement for attaching .20

Shipping weight 3 lbs.

Style 21

Shipments cannot be made via PARCEL POST unless your remittance is sufficient to pay the postage. If any balance remains it will be refunded with our invoice. TO PREVENT DELAYS — Kindly read page one before ordering.

VITRAGOLD — Enameled Copper

The material used in VITRAGOLD is high-grade translucent vitreous gold enamel which is melted under extremely high temperatures (1400-1800° F) upon a heavy copper base. After the enamel is fired it becomes glass hard with a perfectly smooth surface and a brilliant gold sheen. This gold color, exclusive in VITRAGOLD goes entirely through the enamel.

VITRAGOLD window letters and numerals are permanent, being unaffected by wear, weather, acids or other destructive agents. A sign of VITRAGOLD letters is everlasting; its brilliant color never fades.

VITRAGOLD letters can be supplied to order on hammered copper in translucent colors and on smooth copper in opaque colors.

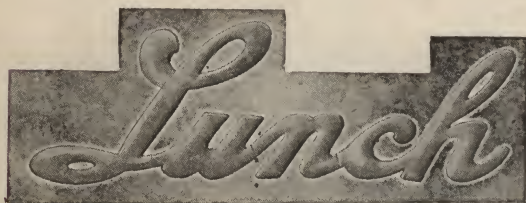

The translucent colors are: RED, BLUE, STEEL GRAY, PEACH and GOLD. Hammered copper is used with translucent colors except the Roman style, as shown by illustration, style 121.

The opaque colors are: WHITE, RED, BLUE, GREEN and ORANGE.

SCRIPT

Vitragold

Vitragold letters can be made in almost any special style such as script, trade-marks, signatures, etc. in sizes, three inch and larger in various colors as stated above on hammered or smooth copper base.

Style 123

Style 16

THERE IS A MESSAGE FOR YOU ON PAGE ONE

SPECIAL STYLES OF ENAMELED LETTERS

White enameled and Vitragold letters can be made in any style. The illustration on the left shows the plain block style used in conjunction with a panel and a special style to form a trade-mark.

When requesting quotations on special styles state the width of your windows and send a copy of the inscription.

The illustration on the right is a photograph of one of the John R. Thompson Corporation's restaurants. We attached their first sign in 1890 and since then have lettered more than four hundred windows in Chicago and other cities with WHITE ENAMELED LETTERS for this firm, which more than proves that enameled letters give the utmost in service, advertising value and satisfaction.

The fronts of unsightly buildings can be made very attractive by covering them with enameled steel at a fraction of the cost of tile.

The enameled steel can be mounted in metal covered frames illustrated on page twenty-three, or screwed to the brick or wood fronts. See page twenty.

A very pleasing display can be obtained by combining SCRIPT, OLD ENGLISH and BLOCK styles as shown in the photograph at the left.

Special styles of enameled letters are made in sections, thus making it easy to handle the letters. Full size sketches are supplied with every order which enables any one to letter his windows with very attractive signs. See page ten for instructions.

AN ATTRACTIVE STORE FRONT IS AN INVITATION TO CUSTOMERS.

CONVEX GOLD GLASS

LETTERS, HOUSE NUMBERS AND EMBLEMS

On pages six to eight are listed various styles CONVEX GOLD GLASS letters, figures, and emblems which can be easily attached to any hard surface such as glass, brick stone, wood, etc.

Anyone can make very durable and attractive signs with CONVEX GOLD GLASS letters if our cement is used.

CONVEX GOLD GLASS is made of crystal glass and the gold color is fired to the under surface by a process similar to that used in decorating china. This process insures permanency of color.

As the face of these letters is convex or half round, they are legible at a greater angle than flat face letters.

Signs made with CONVEX GOLD LETTERS have been in continuous use for over twenty years. See page ten for instructions for attaching letters.

Used to indicate directions or to emphasize a statement or price in a sign or announcement.

Length	Each
2 3/4 inches	----- \$0.29
4 inches	----- .38
5 1/2 inches	----- .56

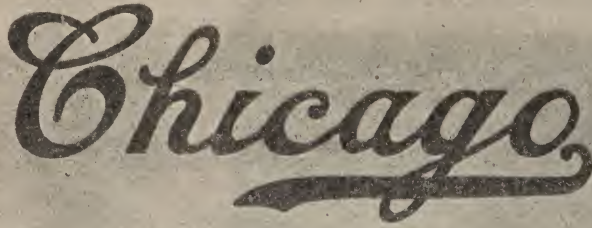

Style 48

When ordering state in which direction index is to point.

Decorated white, red or green to order instead of gold, add 10% to above prices.

INCLUDE A SUFFICIENT AMOUNT IN YOUR REMITTANCE TO COVER PARCEL POST CHARGES. IF ANY BALANCE IS LEFT, IT WILL BE REFUNDED WITH OUR INVOICE.

Style 120

FLAT GLASS LETTERS

These letters are hand cut from GOLD or SILVER colored glass. As the glass is impregnated entirely through with the color, it can never fade or discolor.

Flat Glass Letters can be cut in any style, signature, emblem or trade mark in any size larger than three inch.

The faces of the letters are smooth and the backs are rough or pebbled. The pebbled surface reflects the light from any angle.

Prices are quoted on application. State the sizes of your windows and send a copy of the desired inscription. We will send samples of the glass with our quotation.

See page eleven for the proper method of measuring script letters.

FLAT GLASS LETTERS are easily attached by following the instructions on page ten.

OPAL GLASS LETTERS

Opal Glass letters have proven a welcome addition to the Sign Letter Family as they can never change color and always remain snow white.

These letters can be cemented to widows, vitrolite and plate glass and sign boards.

Beautiful effects can be obtained by attaching Opal Glass letters to black and jade vitrolite.

Signs of this construction will last a lifetime as neither the background or letters can ever fade or deteriorate.

THERE IS A MESSAGE FOR YOU ON PAGE ONE.

DIRECTIONS FOR ATTACHING ENAMEL AND GLASS LETTERS

Arrange your letters on a table or counter, precisely as you wish your sign to appear. Get the exact center of the space it will occupy from left to right, and mark this by a line from top to bottom; for a curved line use a piece of chalk and a string; for straight lines, use a rule or straight edge. Find the center of your window and duplicate thereon the lines made on your table, and commence with the center letter. Cement every edge evenly by using a pointed knife, as shown in the above illustration, then place the letter in position and press it firmly against the glass until the cement protrudes slightly at the edge; proceed with the others in the same way, working to right or left as you prefer. When all the letters have been placed, cut the cement from the edges with your knife, and clean with a cloth.

ALL EDGES SHOULD BE WELL SEALED WITH CEMENT.

The top diagram will serve as a guide for arranging lines and letters.

To keep the large letters from slipping, hold them in place with paper stickers until the cement sets.

If the cement is too stiff for working, add a few drops of Varnish; if too soft, work in a little Dry White Lead.

Do not wash the Window for one week after The Sign is on.

DIRECTIONS FOR ATTACHING SCRIPT LETTERS TO WINDOWS.

First attach the design on the inside of your window with stickers. Draw lines on the outside to correspond with the base lines on the sketch and proceed as above. **SAVE THE SKETCH FOR FUTURE USE.**

HOW TO MEASURE SCRIPT

In computing the cost of script letters such the white enamel, style 12; Vitragold, style 123 and Flat Glass, style 120, it is necessary to draw a full size sketch.

The capitals are generally three times the size of the lower case letters. Letters that extend above or below the base lines, such as "f", "g", "h", "j", etc., are generally twice the size of the regular letters, "a", "e", "c", etc.

Each letter is measured the longest way or across the greatest dimension as shown by the arrows in the above illustration.

Two piece capitals like the above capital "T" are measured as shown. The cross bar and the vertical stroke are measured separately.

THIS METHOD IS NOT USED FOR CONVEX GOLD GLASS SCRIPT LETTERS OR GOLD FOIL LETTERS, STYLES 57 AND 64.

WHITE LEAD CEMENT

No.	For Attaching All Glass and Enamel Letters	Per Box
96A	Will attach eight upright inches -----	\$0.07
96B	Will attach twenty upright inches -----	.12
96C	Will attach twenty-five upright inches -----	.15
96D	Will attach seventy-five upright inches -----	.25
96E	Will attach 125 upright inches -----	.35
96F	Will attach 200 upright inches -----	.50
96G	Will attach 300 upright inches -----	.70
96H	Twenty-five pound pail -----	5.00

Cement will not get hard if kept covered with water.

When computing the amount of cement required, always allow more for letters larger than five inch. If the proper amount is not known include a sufficient amount in your remittance and we will send enough. If you remit too much, the balance will be refunded with our invoice.

WAX CEMENT

For Attaching Letters by the "Hot Process"

Must be softened by heating before application. Small size box, each \$.25. Large size box, each \$.45.

We do not recommend Wax Cement for inexperienced workers.

DIAMOND FLASHER BUTTONS

Will Turn Your Electric Lights into Dancing Stars

WHAT IT IS

The Diamond Flasher Button is a small disc about the size of a quarter. In the center is a thermostat which expands with the heat of electricity (making the circuit) and then contracts as it cools (breaking the circuit). This making and breaking of the circuit is automatic, regular, and rapid, and gives continuous flashing.

Exact Size

Button No. 150B—Beacon Light.

Button No. 150T—Twinkle Light.

Capacity up to 60 watt, 125 volt.

The Beacon Light is slow flashing and regular. Adaptable for use with individual lamps.

The Twinkle Light is quick flashing and recommended for signs or clusters of lamps.

Price 60 Cents Each

Shipping Weight, One to Thirty Buttons One Lb.

HOW INSTALLED

The Diamond Flasher Button is installed by a simple operation; unscrew electric light from socket—with the current off; insert Diamond Flasher Button in socket;

screw lamp back into socket; then turn on current, and in less than 30 seconds the lamp will light and flash.

The effect in a single lamp is fascinating; in a large sign it compels the attention of the beholder in a degree never before achieved. Every lamp flashes independently, giving the most effective continuous motion ever devised. And, note this important point, the sign can always be read. If you have a sign illuminated one second and dark the next, it is working for you only 30 minutes out of each hour. Signs equipped with Diamond Flasher Buttons are talking for you 60 minutes every hour.

MARK THESE ADVANTAGES

1. It saves approximately 35% on electric current.
(To prove this on your own meter turn on several lights, check revolutions of meter dial, in, say four minutes, then insert Diamond Flasher Buttons in the same lights and you will get about half the revolutions in an equal period of time.)
2. It requires no motor.
3. Requires no mechanical apparatus.
4. It requires no change in your present equipment.
5. No adjustments, no servicing, no expense for maintenance.
6. Cannot damage lamps, rather, it tends to lengthen their life.

ONE BUTTON WILL FLASH YOUR XMAS TREE STRING—(8 lamps)

FOIL LETTERS, FIGURES & EMBLEMS

Foil letters are one of the easiest kinds of letters to attach. They are applied to inside of glass with varnish and make very inexpensive signs. Anyone can make neat and attractive signs. See page fifteen for instructions.

Foil letters may be used on any smooth surface, such as the panels of trucks by first varnishing the backs of the letters and attaching them face out. After the letters are in place, the face must be well varnished to protect them against dirt and water.

SCRIPT LETTERS — Gold Foil

Gold foil letters can be cut in any special style, such as trade-marks, signatures, etc.

We can supply script letters in any size reproduced from full size sketches or small illustrations, such as letter heads, photographs, menus, business cards, etc.

Script letters are made with black, red, blue or green shading or outlined in the same colors.

The cost of script letters is based on the actual length. The height is drawn in proportion to the length of sign and the number of letters in the words.

Style 64

	Without Scroll	With Scroll
Less than 12 inches long	\$2.00	\$2.30
12 inches to 4 feet, per foot	2.00	2.30
Longer than 4 feet, per foot	2.50	3.00

For letters cut in scroll add 8c per letter.

For double shade, such as black and red, black and green or black and blue, add 25% to script price. Sample script sign, eight inches in length, "SCRIPT" with the letters, "Signs" cut in scroll as shown by illustration, \$1.00.

Special Letters and Designs Made to Order

CADILLAC Old English

Style 65

Gold foil letters can be cut in any special style from illustrations sent to us.

With black shade or black outline.

Two to six inch, 12c per upright inch.

Larger than six inch, 16c per upright inch.

For red, blue or green shade or outline, instead of black, add 15%.

For double shade, such as black and red, black and blue or black and green, add 25%.

Style 65 is made to order and cannot be exchanged or returned for credit.

The reverse side of the PURE FOOD SIGN, number 169 reads "THANK YOU."
SEE PRICE LIST ON PRECEEDING PAGE

INCLUDE A SUFFICIENT AMOUNT IN YOUR REMITTANCE TO COVER PARCEL POST CHARGES. IF ANY BALANCE IS LEFT, IT WILL BE REFUNDED WITH OUR INVOICE.

DIRECTIONS FOR APPLYING FOIL SIGN LETTERS

To letter Windows, Transoms, etc., first clean the glass thoroughly on the inside, then find the center from the right to the left and mark with a piece of chalk on the outside. If the letters are to be placed in a curve, use a piece of twine attached to a piece of chalk and holding the twine with one hand mark the glass on the outside where the bottom of the letters should come (see Figure 1.) The straight lines may be made with a chalk line or a straight edge.

Before you apply the letters, lay them face down on a table or other smooth surface, spacing them carefully as they are to appear on the glass, as shown in Figure 2. Now proceed to apply the letters. Beginning with the upper line, take the letter nearest the center, lay it on a piece of cardboard and give the face a liberal coat of varnish, using a camel hair brush.

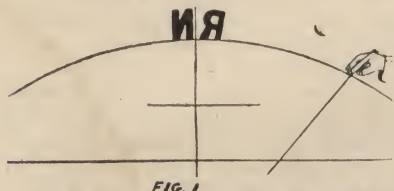

FIG. 1

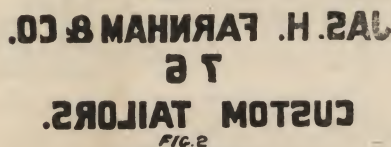

FIG. 2

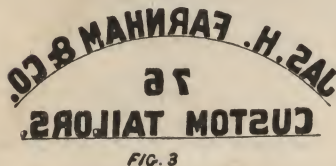

FIG. 3

FIG. 4

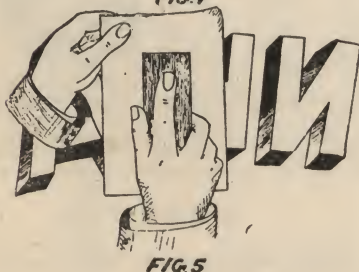

FIG. 5

Brushes and varnish are listed on page thirteen.

Place the letter in position on the window and rub it down close to the glass with the fingers. Apply the next letter in the same manner, and so on, until all the first line are on. Go to the front of the window to see if all are in their proper positions; if so take a clean piece of paper (manila is best), place it over the letters and with a burnisher carefully smooth them down, as shown in Figure 5. The letters may be moved a little, if necessary. In case a letter has been taken off, it must have another coat of varnish before replacing. After the letters are all in their proper places, go over them carefully with the paper and burnisher.

Take a piece of soft cloth and clean the varnish from the glass. If it has become sticky, wet the cloth with kerosene oil and it can be removed easily. Now go over the letters again with the paper and burnisher to make sure they are all down close to the glass. Clean the glass again, and they are now ready to be varnished, which is done by varnishing around the edge of the letters with a small camel hair brush, using a good quality of varnish—Spar is best. Let the brush run over on the glass slightly, which will seal up the edges and make the sign durable.

It is necessary that a liberal amount of varnish be used to force out the air from under the letters, otherwise small white air spots will appear in the shading. It is also necessary to burnish the letters close to the glass and that all parts of the letters are down smooth, otherwise the letters are apt to be displaced in cleaning the window. The Varnish dries slowly, therefore the window should not be washed for at least three days after the lettering.

EXPLANATIONS OF ILLUSTRATIONS

- Figure 1—Shows the window marked ready for lettering.
- Figure 2—Shows the letters spaced, with face down, to get the center of the sign.
- Figure 3—Shows letters applied to window, inside view.
- Figure 4—Shows sign finished.
- Figure 5—Shows the manner in which the paper and burnisher are used.

The burnisher is made from a piece of cigar box wood, 5x1½ inches, with the ends sandpapered smooth, or a stiff piece of cardboard.

Use Damar, No. 1 Coach or any good varnish outside; varnish thinned with turpentine, for applying the letters to the glass. Use two-thirds varnish, one-third turpentine.

BRUSHES AND VARNISH ARE LISTED ON PAGE THIRTEEN.

CONCAVE METAL LETTERS

"CONCAVE LETTERS" are attached to the inside of windows and to the reverse side of glass for hanging signs.

These letters are cut from sheet brass and are gilded with genuine gold leaf. Because of the "V" shape, light is reflected from any angle, consequently "CONCAVE" letters are legible at greater angles than gold leaf or painted signs.

The following illustrations show the various stock styles, but "CONCAVE" letters can be made to order in script, trade-marks or special designs.

AS "CONCAVE" LETTERS ARE GILDED TO ORDER, THEY CANNOT BE EXCHANGED OR RETURNED FOR CREDIT.

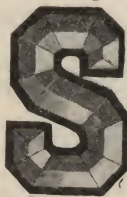

BRILLIANT

"Concave" Letters

This style is in use on windows in almost every city in the country and almost every one is familiar with the well known "KOD-
AK" signs.

Letters and figures same price.

1 inch	-----\$0.10	2 inch	-----\$0.16
1 ½ inch	-----.12	3 inch	-----.24

Periods and commas, any size 4c. Patterns: 7c per upright inch each.

CEMENT

"Concave" Letters

Two kinds of cement are required for attaching Concave letters. The use of both kinds is explained on page seventeen. No. 328, for Stripping. No. 329, for Backing.

Size	Per Box	Size	Per Box
Fluid Oz		Fluid Oz.	
¾ Oz.	-----\$0.25	3 Oz.	-----\$0.50
1 ½ Oz.	-----.30	6 Oz.	-----.95
2 Oz.	-----.35	12 Oz.	-----1.80

One, three ounce box No. 328 cement for stripping and one, three ounce box No. 329 cement for backing will attach, twenty-five four inch letters.

The ¾ ounce sizes are used for replacing one or two small letters.

SHEET FOIL

For layouts—See instructions on page seventeen.

12 inches wide, any length

Sufficient foil is required to cover the glass that the letters are to occupy, i. e., if the letters are to be spread over an area of 60x30 inches, fifteen lineal feet of foil, 12 inches wide will be required.

No. 330—Sheet Foil, any length 12 inches wide, per pound--\$0.50

Minimum weight, one pound

If in doubt regarding the amount you will require, state the size of the space the letters are to occupy and we will send you the proper length.

DIRECTIONS FOR ATTACHING CONCAVE LETTERS

Wet the inside of the window with water and smooth on sheet foil so as to cover the entire space the letters are to occupy. After the foil has been loosely attached to the glass with water, hold two or three sheets of newspaper over the foil and with edge of a piece of cigar box smooth all bubbles and wrinkles out of the foil.

Snap chalk lines on the foil to show the top and bottom lines of the letters.

Place the patterns in their proper positions and cut a double line in the foil with bow spring dividers. The points of the dividers should be set twice the width of the flanges of the letters.

Remove the narrow ribbon of foil made by cutting around the edges of the patterns being careful not to disturb the remaining foil.

With a stiff brush, flow a coat of No. 328 cement on the glass exposed by removing the ribbons of foil.

Remove the foil letters formed by cutting around the patterns.

After the cement has dried sufficiently to become "tacky," place the letter in position and press the flanges down with the blade of a screw driver. Do not press hard enough to spring the letter.

IF SIGN IS TO HAVE A CLEAR BACKGROUND.

After all of the letters are in place, flow a generous coat of No. 329 cement over the entire backs of the letters onto the narrow strip of glass between the foil and the edges of the letters. The foil will prevent the backing cement from spreading over the glass where it is not required.

Permit the backing cement to dry until set, but not thoroughly dry and then strip off all of the foil from around the letters and remove the small pieces of foil from the centers of the letters.

DO NOT WASH WINDOW FOR FIVE DAYS.

IF SIGN IS TO HAVE BLACK BACKGROUND

After all of the letters are in place, mark off the panel in the foil using one leg of the dividers so as to leave a ribbon of foil marking the boundary of the panel.

Remove all foil except ribbon around the edge of the panel.

Permit the water that was used to stick the foil to the window to dry.

Flow a generous coat of No. 320 backing cement over the letters and windows. Be sure to thoroughly seal the edges of the letters.

Allow the backing cement to dry until slightly set and remove the foil that was left on the window to mark the boundary of the panel.

DO NOT WASH THE WINDOW FOR FIVE DAYS.

AS CONCAVE LETTERS ARE GILDED TO ORDER THEY CANNOT BE EXCHANGED OR RETURNED FOR CREDIT.

No. 115B
Wizard
Cutter

THE WIZARD SCRAPERS AND CUTTERS

are all that the name implies. You will realize how indispensable they are once you have used them.

Note the guard to protect the blade when not in use, also screw-driver tip to remove screws. The screws and lugs hold the blade absolutely firm, eliminating the slipping of blade when pressure is required. Both sides of the Gillette or Durham Duplex blade can be used. When one side is worn, reverse the blade. The entire outfit is made of 22 gauge steel.

**SIMPLE, LIGHT
NEAT, STRONG**

SCRAPER

Can be used by janitors, painters, sign writers, housewife, window cleaners, machinists, auto repairmen, stores, factories.

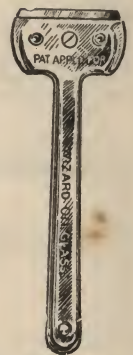

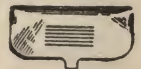

CUTTER

Can be used by artists, sign writer, tailors, dressmakers, office, home and many other lines of users.

THE WIZARDS HAVE 1,000 USES.

PRICE, 25c EACH

Shipping weight, one to four Scrapers or Cutters, one pound.

Complete board signs made to order. Letters finished in any color or gold leaf. Backgrounds in smalt, any color. Prices quoted on application. State size of space—reading matter and style of letters preferred.

CORNISH EUREKA GOLD SIZE

CORNISH EUREKA GOLD SIZE is put up in air tight screw cans, always ready for use, and is a valuable addition to the kit of every Painter, Decorator and Signwriter for the production of better work.

The EUREKA GOLD SIZE fulfills all the requirements of a first class article. It is manufactured from high grade materials and we guarantee all that is claimed for it.

A trial is sufficient to establish its merits, and we find that when once used, always used.

The "QUICK" will gild two hours after being put on and will retain sufficient tack to take any leaf for twenty-four hours.

The "SLOW" is an overnight size and for work that is not to be varnished. For all work exposed to the weather it will be found to be invaluable. After ten hours it has a strong "tack" and will continue to take the leaf for forty-eight hours. It does not sag, or run to an edge, works freely under the pencil, and gives a brilliant burnish.

1/4 pint 50c 1/2 pint 75c Pint \$1.35 Quart \$2.40

701F Chrome Yellow	10.00	5.50	.24
701G Standard White	7.00	4.00	.20

DIRECTIONS

First paint or gild letters and let them dry thoroughly. Then cut in background with paint containing plenty of linseed oil and very little dryer or turpentine. The paint should be as nearly as possible the same color as the smalt.

After the background has been entirely cut in, sprinkle the smalt liberally over the wet paint with a small sifter and permit the sign to dry for forty-eight hours. When the sign is dry, the surplus smalt should be shaken onto paper and returned to the bag.

Each square foot of surface will require one pound.

ENAMELED STEEL SIGNS

ENAMELED STEEL SIGNS are the most durable that can be made. They can be made any size or shape to fit any space. Practically all shades and colors can be supplied, but the colors most commonly used are blue and white.

Much valuable advertising is lost by not utilizing all the available space on building walls, store fronts, trucks or wagons.

A STORE FRONT TO BE PROUD OF

The illustration on the left is an un-retouched photograph of a store front that actually invites one to go in. The extremely clean appearance of the enameled steel signs and enameled window letters guarantee that the food served on the inside will also be clean.

THE FIRST IMPRESSION IS MADE ON A PROSPECTIVE CUSTOMER BY THE STORE FRONT.

Look at the front of your store.—Are you waisting valuable advertising space?

THE FIRST COST IS THE LAST.

GENUINE PORCELAIN ENAMELED STEEL SIGNS will last many years.

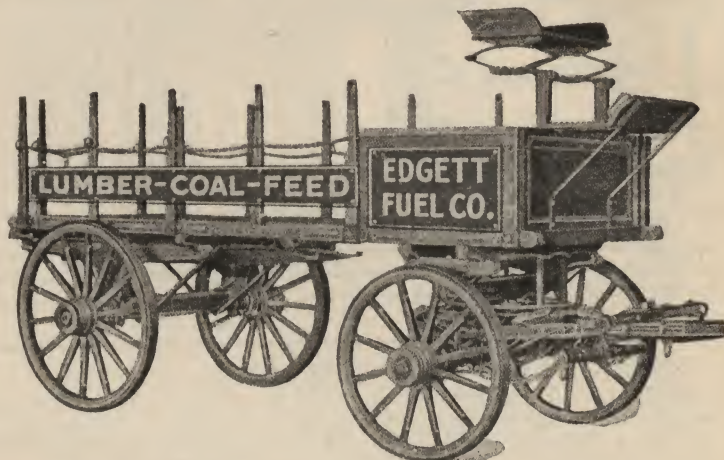

Write to us today. State the sizes, the inscriptions, colors and whether or not you desire frames.

PUT YOUR "AD" ON WHEELS

Keep Your Name Before
PROSPECTIVE BUYERS

Every truck and wagon has valuable advertising space. The panels, tail gates and sides are waiting to tell your message to a countless number of buyers every day.

No one can afford to do without advertising.

*PUSH and PULL plates read vertically.

Stock plates with BLACK letters are made to order only and cost the same as special plates.

Style 34A	Each	Shipping weight	
Style 34	60c	Five plate or less	2 lbs.
	75c	Six plates or less	2 lbs.

Round head brass screws 7c per dozen, 75c gross

Plates with special inscriptions, style 34, blue or black letters, can be made to order. Delivery will be made in one week or less from day order is received.

Special Plates With One Line of Blue or Black Letters ----- Style 34, size 10x2½ inches, Each \$1.60

Special Plates With Two Lines of Blue or Black Letters ----- Style 34, size 10x2½ inches, Each 2.60

STOCK PLATES with BLACK letters made to order only at same prices as special plates.

SPECIAL PLATES NOT MADE IN STYLE 34A. SEE STYLE 27, BELOW.

ENAMEL NAME PLATES

For Office Doors, Desks, Etc.

Enameled on copper. The letters and figures enameled black or blue with or without gold trimming, fired on a pure white background, make the cleanest and most durable plate that can be used. Especially adapted to hospitals for donor and memorial plates. The steady use of these plates for more than forty years has proven their popularity beyond any doubt.

Style 27—Fancy Ends

Size	Black Letters or Figures	Gold	
		Each	Trimmed
¾"x2½"	Each	\$0.60	\$0.70
1"x3¼"		.70	.80
1½"x3¾"		.80	.90
2"x6"		1.06	1.60
2¼"x7"		1.20	2.00
2½"x8"		1.40	2.10
2½"x9"		1.80	2.50
3"x10"		2.10	2.90

Style 24—Oval Ends

Size	Black Letters or Figures	Gold	
		Each	Trimmed
¾"x3"	Each	\$0.50	\$0.60
1"x4"		.54	.67
1¼"x5"		.70	.80
1½"x6"		.80	.90
1½"x7"		.90	1.10
1½"x8"		1.10	1.30
1½"x9"		1.30	1.50

The above prices are for plates with one line of letters or figures. Add 50% for each additional line.

To obtain cost of plates with blue letters or figures add 33 1-3% to above prices. Plates smaller than 1¼"x5" cannot be made with blue letters or figures.

For sizes not listed, use price of next larger size.

Round head brass wood screws for attaching above plates, 7c dozen, 75c gross.

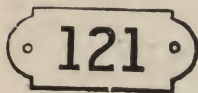

HAVE YOU READ THE MESSAGE ON PAGE ONE??????

ENAMELED PLATES

ENAMELED on copper are used for many purposes, such as numbering hotel doors, church pews, postoffice boxes, etc.; for bell plates, "Push" and "Pull" plates, door and name plates; for labeling grocers' and druggists' drawers; for street name and number plates, etc. The letters and figures, enameled black or blue with or without a gold trimming fired in, on a pure white ground, make the cleanest and most durable plate that can be used, much superior to any metal plate.

NUMBER PLATES

Enameled on Copper

Style 22

	Black or blue figures trimmed	Gold
	Each	Each
$\frac{1}{2}$ "x1 $\frac{1}{2}$ "	-----21c-----	-----32c-----

HANDY HOUSE NUMBERS

Enameled Iron

Size	Each	Dozen	Fifty	Hundred
2"x3"	30c	\$3.00	\$10.00	\$18.00

These number plates, because of the contrasting colors, are legible in even a dim light. Made of iron finished in white porcelain enamel with blue figures. One figure on each plate.

Style 40
White Plates
Blue Figures

STREET NAME PLATES

Enameled on No. 18 Gauge Armco Iron

Style 36

Porcelain enameled iron signs are used to designate the names of streets in almost all cities using street names. They are more durable and more popular than any other type.

The usual or standard size is 20 in. x 4 in., blue ground, with three inch white letters.

Street signs can be made single face or double face, any size and color.

Prices quoted on application. State size, colors, whether single or double face and the quantity of signs required for each street name.

PHYSICIANS'

CROSSES

Genuine Porcelain—Enameled Steel

Green cross on white ground; very legible, can be seen from a great distance. Size 5x5 inches, Each \$1.00. Shipping weight, one or two plates, one pound.

Style 37

METAL MOULDING Wood Filled

The appearance of any sign is greatly enhanced by framing it suitably. The life of a sign is greatly increased by the protection afforded by framing it in metal.

The moulding is made in three widths, $\frac{5}{8}$, one, and $1\frac{1}{4}$ inch and in five finishes: polished brass, polished copper, oxidized black copper, mottled oxidized copper and statuary copper.

The cost of complete frames is computed by doubling outside measurement, length and width, in lineal feet, i. e., a frame having an overall size of 26x14 inches contains seven lineal feet, plus one foot for waste in cutting the miters at the corners, or eight feet would cost \$5.60 if made of 1 in. moulding.

Fractions of less than one-half foot are figured as one-half a lineal foot. Fractions of more than one-half foot are figured as one lineal foot.

If in doubt of the sizes to specify when ordering frame for the front of a building for bulkhead signs, send a rough sketch of the front of the building. See photograph on page twenty. Do not fail to allow for doors that open outward.

When the sidewalk appears to slope as compared to the store front so that the vertical measurements at each end of the frame are not the same, be sure to state whether right angles (90°) angles are located at the top or bottom of the frame.

Style 147

CORNER PIECES

Corner pieces are used at corners to cover unsightly joints.

	Each
For $\frac{5}{8}$ inch moulding	\$0.20
For 1 inch moulding	.20
For $1\frac{1}{4}$ inch moulding	.28

Complete Frames with Wood Backs

	Per Lineal Foot
$\frac{5}{8}$ inch moulding	\$.70
1 inch moulding	.70
$1\frac{1}{4}$ inch moulding	1.00
Minimum charge \$3.00 for one frame	
State style and size of moulding and whether the measurements are sign sizes or overall sizes.	

MOULDING ONLY, NO BACKS

Metal moulding can be supplied cut to any length with corners mitered and without backs. In computing the cost, one foot must be added for wastage in cutting.

$\frac{5}{8}$ inch, per lineal foot	\$.30
1 inch, per lineal foot	.30
$1\frac{1}{4}$ inch, per lineal foot	.60

Minimum charge \$1.50

State width and finish.

To Obtain Sign Size When Overall Size of Frame Is Known

For $\frac{5}{8}$ inch moulding deduct one inch from length and width.
For one inch moulding deduct $1\frac{1}{2}$ inch from length and width.
For $1\frac{1}{4}$ inch moulding deduct 2 inches from length and width.

ELECTRIC SIGNS

Change the "Passers By" To Buyers

Electric Signs are in greater demand than ever and a strongly constructed, properly designed electric sign is an investment that will pay for itself many times by increasing sales and by enhancing the appearance of a store front or show window.

While the cost of most of the commodities of life have been steadily increasing, the cost of electricity has just as steadily decreased until now it is false economy not to use a generous electrical display to advertise your merchandise and your service.

By the proper diffusion of the light we are able to obtain wonderful illumination with the minimum amount of current consumed.

SPECIAL LAMPS are not used in any of our electrical signs. We use standard, genuine Mazda lamps that can be procured from the electrical shops in all cities.

The fronts of our electric signs are finished in "No-Glare" colors so that none of the advertising value is lost through improper reflection.

ABSOLUTELY GUARANTEED AGAINST DEFECTS

The various part of our signs are strongly constructed and ruggedly assembled. The lamps are the only parts that can depreciate and they can be easily replaced for a few cents.

TRADE-MARKS

We do not limit you to stock designs of letters. Your individual designs, trade-marks or styles of letters can be duplicated in any of our electric signs at no additional cost.

WHEN ORDERING

WHEN ORDERING kindly state whether the signs are for indoor or outdoor use and how they are to be hung. It is a good plan to send a rough sketch showing the layout desired, approximate sizes of the letters and the position of the outlet for the cord to be used in connecting the sign to your service receptacle. At a slight addition of cost it is possible to construct the following signs for out-door use.

"RA-LITE" ELECTRIC SIGNS GAS TUBE COLORS (Ray Light)

"RA-LITES," because of their brilliant penetrating colors, demand attention when other mediums fail. The letters, trade marks, etc. are usually a brilliant red and the borders in vivid green, however, blue and amber are also used.

The glass is sandblasted so as to leave the letters and borders slightly raised. The background is finished in a very pleasing and attractive marble-like white.

IT IS IMPOSSIBLE TO IMAGINE THE WONDERFUL EFFECT, PRODUCED BY RA-LITE SIGNS.

RA-LITE signs are made in two styles—Style 2035 has a beautiful bronze (Not plated) frame as shown in the illustration. The wood frames used on Style 2036 are "Two-Tone," green and gold.

Style 2035, with bronze frame as illustrated
Style 2036, with wood frame.

Glass Size	BRONZE FRAME		WOOD FRAME	
	Iron Back		Iron Back	
	Single Face	Double Face	Single Face	Double Face
6x18 in.	\$17.65	\$22.10	\$15.30	
6x24 in.	22.65	31.75	19.25	
6x30 in.	26.50	37.00	22.80	
6x36 in.	31.25	43.50	26.80	
8x24 in.	28.50	38.50	20.50	\$29.85
8x30 in.	33.50	45.50	23.70	32.80

Glass Size	BRONZE FRAME		WOOD FRAME	
	Iron Back		Iron Back	
	Single Face	Double Face	Single Face	Double Face
8x36 in.	\$37.00	\$49.65	\$27.65	\$41.15
10x30 in.	38.65	51.75	29.65	43.15
10x40 in.	44.90	61.15	35.40	50.65
10x48 in.	49.75	68.70	42.20	61.70
12x36 in.	43.25	56.50	34.65	52.25
12x48 in.	54.90	77.15	47.40	64.15

Compare these prices with the cost of Gas Tube Signs—Initial and Maintenance.

The above prices include genuine Mazda lamps, eight feet of standard P. S. cord and two piece attachment plug.

Any reading matter may be had; not over twenty letters per square foot. If more than twenty letters per square foot, there will be an additional charge of 25c for each additional letter.

Simple trade-marks and special designs of letters can be had at no extra charge.

BEFORE ORDERING, kindly read the last paragraph at the top of this page.

ECONOMY SIGNS

LOW FIRST COST LOW OPERATION COST PRACTICALLY NO MAINTENANCE COST

The inscription is sandblasted into opal glass which illuminates with a clear intense white with use of only two, twenty-five watt Mazda lamps.

Styles 2000 and 2001 may be operated for **TWENTY HOURS FOR A COST OF ONLY SIX CENTS** at the rate of 6c per kilo-watt hour.

Any inscription containing not more than twenty letters.
Beautiful two-tone green and gold wood frame.

Glass Size, 18x6 inches

Style 2000	Equipped with two lamps burning steadily -----	\$12.00
Style 2001	Equipped with two lamps flashing on and off -----	13.30
Style 2002	Equipped with two white lamps flashing slowly on and off and one red lamp blinking rapidly—an appearance of a triple action -----	14.80

COMPLETE WITH LAMPS, EIGHT FEET CORD, TWO PIECE ATTACHMENT PLUG AND CHAIN, READY TO USE.

Styles 2000, 2001 and 2002

ECONOMY SIGNS Electric (Special Sizes) Style 2003

The construction of these signs is practically the same as style 2000 illustrated above except that the back is made square and the number of lamps is increased proportionately for the larger sizes.

FRAME—Wood—Very attractive two-tone green and gold finish.

GLASS—Sandblasted opal, background finished in any color.

BACK—Galvanized iron finished in egg-shell gloss black lacquer.

Any inscription containing not more than twenty letters per square foot.

Glass Size	Single Face	Double Face
6"x24"-----	\$18.75-----	
6"x30"-----	22.25-----	
6"x36"-----	25.90-----	
8"x24"-----	19.90-----	\$28.50
8"x30"-----	21.90-----	31.50

12"x36"-----	33.00-----	48.00
12"x48"-----	45.25-----	59.75

The above prices include lamps, eight feet of standard cord, two piece attachment plug, six feet safety chain and hooks for hanging.

Larger sizes quoted on application. State size of sign or the approximate sizes of letters and the inscription.

Read last paragraph at the top of page twenty-four before ordering.

"OPAL" BOX TYPE ELECTRIC SIGNS For Exterior and Interior Use

"OPAL" signs are made with box type frames for out-door use.

The glass used in exterior signs is the same as described above and is set in **BRONZE** (not plated) frames. The backs or boxes are strongly constructed of galvanized iron for the larger sizes and of terrne plate for the smaller sizes. Terrne plate is a lead coated sheet iron. Signs made of these metals and finished in weather-proof lacquers will last many years.

Box type signs can also be constructed entirely of bronze which will never rust.

The following price list covers single and double face signs up to and including 12x48 inches, glass size. Larger size quoted on application. State the glass size or the approximate sizes of the letters, the inscription, color, how the sign is to be hung and whether it is to be single or double face.

Glass Size	Bronze Frame, Iron Back		All Bronze	
	Single Face	Double Face	Single Face

Style 2030, All Bronze
Style 2031, Bronze frame, Iron Back

READ THE LAST PARAGRAPH AT THE TOP OF PAGE TWENTY-FOUR BEFORE ORDERING.

DIRECTIONAL SIGNS

Electric

DIRECTIONAL SIGNS are in great demand for the use implied by their name—to direct patrons courteously and quickly so that you may easily satisfy their requirements.

DIRECTIONAL SIGNS are made in two styles, the "OPAL" and the "GREENGLOW" as illustrated and described below.

OUR SINGLE FACE DIRECTIONAL SIGNS CAN BE CHANGED TO DOUBLE FACE SIGNS AT ANY TIME BY REMOVING THE METAL BACK AND INSERTING A SECOND SHEET OF GLASS.

The frames are constructed of solid shell bronze moulding, NOT PLATED—CAN NEVER RUST.

FINISHES—Natural Bronze, Statuary Bronze, black or any sprayed bronze or lacquer colors.

RELAMPING—It is not necessary to take down or dismantle any of our directional signs when replacing lamps. This is an important feature as burnt out lamps are easily and quickly replaced by simply lifting out the reflector in the top.

TYPES

Directional signs are made in various standard types to meet different conditions encountered in hanging.

HANGING TYPE—For hanging from ceiling fixtures, style 2042, or wall brackets, style 2040 and 2041, illustrated on page twenty-seven.

END WALL TYPE—The end of the frame of this type is constructed so that the sign can be attached direct to the wall without the use of a bracket. This style is not made larger than twenty-four inches in length.

FLUSH WALL TYPE—The back of this type is made flat so that the sign can be attached flat against the wall. This type can only be made single face.

OPAL SIGNS

Electric

The glass in our "OPAL" signs illuminates with a clear milk-white opal color without any displeasing greenish or bluish cast. By sand blasting the glass the letters are left slightly raised which adds to their legibility. The background can be finished in any color generally russet bronze or egg shell gloss black are used.

"GREENGLOW" ELECTRIC SIGNS

"GREENGLOW" electric signs, because of their novel method of illumination and narrow frames, are very popular for directional and dignified advertising signs.

The lamps are concealed in the "Cap" at the top of the frame and the light is cast through the edge of the glass so that it is polarized by the sandblasted letters into a pleasing greenish glow.

A special plate glass having a green tinge is used in our "GREENGLOW" electric signs. The letters are deeply sandblasted into the back and the face is left perfectly smooth affording a very easy sign to keep clean.

The letters can be made to illuminate in colors by coloring them on the inside or back.

"GREENGLOW" signs, because they are not legible when not illuminated, are especially useful for temporary and permanent directional signs.

Style 2020

Front and end views—"OPAL" hanging type.

Style 2022 illustrates the end view of "Opal" flush wall type.

Style 2022

End view of "Greenglow" flush wall type, Style 2012.

Style 2012

Style 2010

Front and end view—"GREENGLOW" hanging type.

48"x10"*	53.60	65.45

* "GREENGLOW" signs 30"x10" and larger quoted on application only. The last three sizes marked " *" do not apply to "GREENGLOW" signs as these sizes require a special arrangement of lamps.

The above prices include lamps, eight feet of cord and two piece attachment plug, but does not include chain or fixtures for hanging.

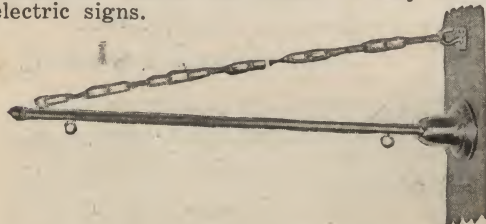

BEFORE ORDERING—Kindly read the last paragraph at the top of page TWENTY-FOUR.

FIXTURES FOR HANGING ELECTRIC SIGNS

WALL BRACKET

Wall brackets are supplied complete ready to attach.

Plated to match the finish of any of our electric signs.

Style 2040 For hanging signs larger than 8"x24" complete with chain and wall hook as illustrated \$6.50

Style 2041 For hanging signs, 8"x24" and smaller. Same as style 2040, but without chain \$5.00

CEILING FIXTURES

For hanging sign from ceiling

Style 2042 For hanging signs from ceiling. Two fixtures are usually required for each sign.
Without chain,
each \$3.00

Style 2043 FIXTURE CHAIN for use with ceiling fixture Style 2042

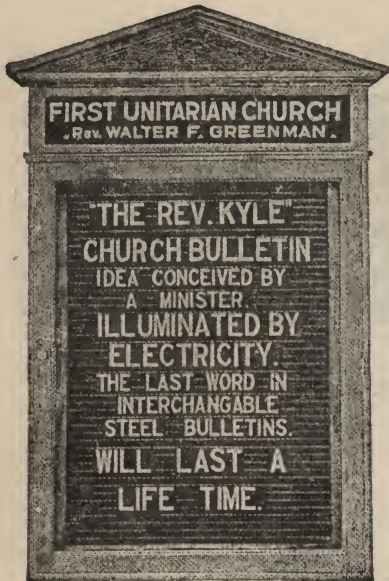

Sprayed finish, per foot \$0.25
Plated finish, per foot .90

Style 2042

ELECTRIC BULLETIN BOARDS

Bronze Frames—For Outdoor Use

Style 2060

Style 2053

BALL ARM BRACKETS

For Canteen Globes

Black enameled, VERY RUGGED. Extends 15 inches from bldg. With six inch cast iron holder wired ready for use. Each \$5.00
Price does not include lamp or canteen globe.

BASES FOR CANTEEN GLOBES

Style 2051

See illustration in left column. Finished in white enamel, wired ready for use.
For 14"x6" or 16"x6" Globes, ----- Each \$5.00
Price does not include lamp

The frame and sides of this CHANGEABLE BULLETIN BOARD are constructed of bronze. The back is made of galvanized iron. This construction affords a bulletin board that will last many years with a minimum amount of attention.

The name plate in the top panel is sandblasted opal glass—white letters and chocolate bronze background.

The changeable section is removable permitting changes of copy to be made indoors.—A very convenient feature.

The celluloid letters used in this board are the same as used for the bulletin boards shown on page fifty-two. As the letters are held in place by felt covered grooves, they cannot slide out of place when removing or inserting the sign section.

THE ENTIRE BULLETIN IS ILLUMINATED.

LEGIBLE DAY AND NIGHT.

THE REMOVABLE SIGN SECTION is tilted back at the top so that the electric lamps, which are behind the opal glass sign section, illuminate the entire Bulletin Board.

Electrically illuminated boards can be made any size. When requesting prices, state the size desired or the amount of copy you desire to use.

Style 2050

The above illustration is a photograph of a sixteen inch globe mounted on style 2051 base. Base is not included in the cost of the globe.

CANTEEN GLOBES

Opal Glass

Canteen Globes have been used for many years when small double or single face signs are required.

The inscription is sandblasted into both sides of the globe. The letters are generally finished in black, however, any two colors may be used at no extra charge.

Size	Each
12"x4" -----	\$10.00
14"x6" -----	13.00
16"x6" -----	16.00

Discounts on quantities of six or more alike; state size, colors and inscriptions.

The first dimension is the diameter of the globe. The second dimension is the diameter of the neck.

The above prices do not include bases or brackets—see styles 2051 and 2052 on this page.

Style 2052

Gooseneck Brackets

For Canteen Globes

STRONGLY CONSTRUCTED—VERY RIGID

Wired and complete with chain as illustrated, ready to hang.

ENGRAVED BRASS SIGNS

Deep and Clean Cut Letters for Long Life

These signs are HAND ENGRAVED and filled with the best AIR-DRYING FILLER. The letters are DEEPLY CUT and they will last for YEARS without re-filling. The best is the cheapest.

Do not confuse engraved signs for outdoor use with etched signs that are shallow and have a thin oxide in the letters which soon wears out. It is often necessary to recut etched signs.

ENGRAVED BRASS SIGNS can be made in any size or style. Simple designs such as Styles 1000 and 1001 are priced on page thirty-one. Other styles are quoted on application.

Style 1003

No design or trade-mark is too difficult to handle by the engraving process. The cost depends on the size of the sign and the labor required. When requesting prices, send a cut (any size) of the design desired.

Style 1001

This cut illustrates a simple type. The cost is based on the area of the sign and the lineal inches of lettering. See price list on page thirty-one.

Due to forming the bevel; beveled edge signs are slightly smaller than the stated sizes; i. e., A 16"x10" beveled edge sign actually measures approximately 15½"x9½".

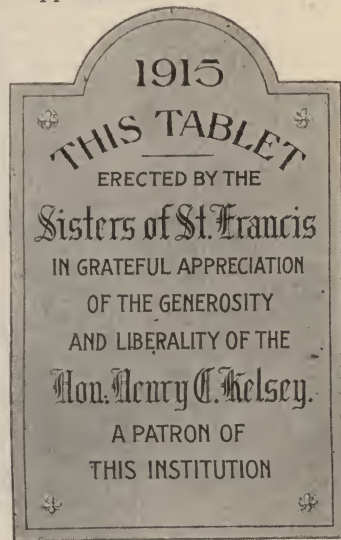

Name plates or "Shingles" as they are sometimes called, have a dignity not afforded by other types. This illustration shows a simple style

Style 1001

having beveled edges. The cost depends on the area and the lineal inches of lettering. See price list on page thirty-one.

Due to forming the bevels, beveled edge engraved brass signs are slightly smaller than the stated sizes, i. e., a 16"x10" sign will actually measure approximately 15½"x9". The loss in area depends on the width of the bevel.

Style 1004

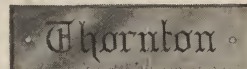

Style 1004 is an illustration of a flat (without beveled edges) engraved brass sign, cut in a special shape. The cost is based on the size and the amount of labor required.

Give all possible details when requesting quotations.

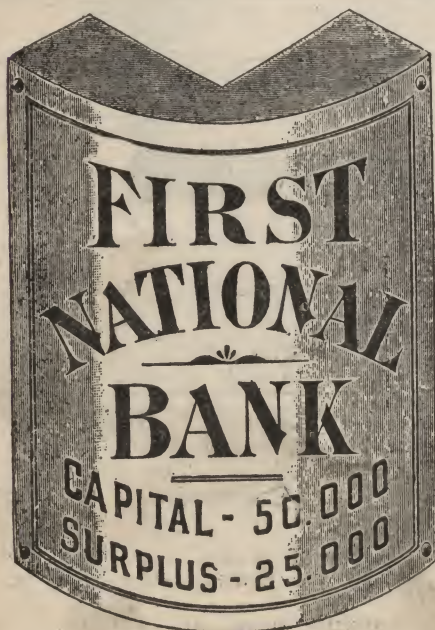

Style 1000

This is a photograph of an 8"x3" memorial plate used for commemoration purposes and for indicating the donors of church windows, altars, etc., and hospital equipment. The cost is based on the lineal inches of lettering and the area. See price list on page thirty-one.

Style 1002

The letters can be engraved in any style. The above illustration shows the Old English letters. To obtain the cost of this style, add \$2.00 to prices shown on page thirty-one for each six lineal inches or less of Old English letters. Simple types of letters such as plain French, Modified Roman, etc., are figured at the base price.

Style 1005

DRUM SIGNS

Engraved Brass

Flat (without beveled edges) engraved brass signs can be bent, "Drummed" to fit around corners of buildings, posts, pilasters, etc. There is no extra charge for drumming brass signs, but an additional charge must be made for the special wood backs that are required. The cost of the backs depends on the size. The charge is usually \$6.00 to \$10.00.

If the sign is to fit a post, state the diameter of it when ordering.

ABOVE PRICES FOR PLAIN LETTERING ONLY. SPECIAL DESIGNS SUCH AS SCRIPT, OLD ENGLISH, SCROLLS, TRADE MARKS, etc., quoted on application. State size, reading matter, style of letters desired, quantity of signs alike and if possible send a rough sketch.

Wood backs for beveled edge engraved brass signs, \$1.50 per square foot.

THE BEST IS CHEAPEST FOR LONG LIFE

The letters on our engraved brass signs are deeply cut (etched signs are shallow) and are filled with the best enamel. They will wear YEARS without refilling. Etched signs are shallow cut and are filled with thin enamel, consequently they have a life only a few months.

REILLING and REPOLISHING Engraved Brass Signs Without RECUTTING the LETTERS

Signs containing thirty-six square inches or less.....	\$2.00 each
Signs larger than thirty-six square inches, up to and including one square foot.....	\$3.00 each
Signs larger than one square foot, charged at $\frac{1}{4}$ square foot basis.....	\$3.00 per square foot

RECUTTING quoted on application. Send a rubbing of your signs.

HAVE YOU READ THE MESSAGE ON PAGE ONE??

NO PARKING

We can honestly claim that this "NO PARKING" sign is the strongest and most durable on the market. Height Overall—48 inches.

The disc is 14" in diameter, 10 gauge Armco Iron. Not a casting—CANNOT BE BROKEN. Black ground, aluminum bronze letters; very legible.

As the letters are deeply cut into both sides of the disc, they can never be defaced. The letters and disc can be refinished by anyone should it ever be necessary.

The bracket is a rugged malleable casting strongly riveted to the disc.

The cast iron base weighing eighteen pounds is sixteen inches in diameter and is designed for great strength. Drilled for bolting to sidewalk.

The standard is black iron pipe driven into the base—not threaded. We do not thread the pipe because we found that this method reduced the strength 50%.

Pipe only	.50
Base only	3.75

The DISCS are drilled with two holes to fit Brackets.

Signs with special inscriptions can be supplied at an additional charge of \$12.00 for the necessary stencils regardless of the number of signs required, i. e., one complete special sign will cost \$24.00; two signs alike, \$36.00 for both.

RAISED LETTER BRASS AND COPPER PLATES

Polished Letters and Borders, Black Backgrounds

Style 1021

Style 1022

Style 1023

Style 1024

Engraved brass and copper plates can be made with the letters and borders in relief. To obtain the cost of styles 1021, 1023 and 1024, add 50% to prices shown on page thirty-one for brass and 65% for copper.

Raised letter brass and copper plates can be cut in any odd shape such as shown by style 1022. Give all possible details when requesting quotation.

See page thirty-three for cast bronze tablets.

CAST BRONZE TABLETS

Cast bronze tablets are the most durable signs that can be made and, although the first cost is higher than for other types, the ultimate cost is less as CAST BRONZE CAN NEVER WEAR OUT.

The background of cast bronze tablets if left in the natural bronze color, will usually weather to a beautiful verdi green.

By the use of a chemical process, we can imitate the natural verdi green. An additional charge of \$1.00 to \$6.00 must be made for this finish. Sprayed lacquer finishes such as black, lacquer verdi green, lacquer bronzes, etc. are applied at no extra charge.

The edges of the tablets and the faces of the letters and borders are finished in a dull polish.

The background of this tablet is a distinctive design of interlocking circles called Romanesque.

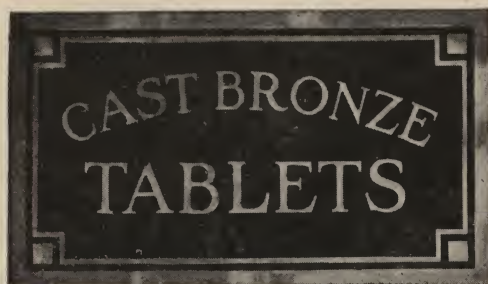

The border is the well known "Egg and Dart" design which lends itself beautifully to cast bronze tablets of this style.

Any type of letters may be used, however, the regular Roman is, undoubtedly, the most pleasing of the conventional designs.

The rosettes in corners are used to conceal the heads of the screws used for attaching the tablet. This style is made with a flat back instead of a "Returned" border as is the general practice with tablets having flat face single and double line borders.

Style 1036

Style 1033

This photograph illustrates a cast bronze tablet using a stock style of letters and "broken" double line border. This style of border is only used on tablets measuring 18"x14" or larger. The overall thickness at the border may be any size. The usual thickness is $\frac{3}{4}$ inch.

The corner ornaments are used to conceal the heads of the screws that attach the tablet.

MEMORIAL TABLETS

Cast Bronze

Style 1030

The motif of this style of tablet is special throughout. The embellishments in the upper corners can be supplied in a wide variety of styles.

When requesting a quotation on this style, state the inscription and send sketches of the border and corner designs.

Style 1037

Another type of ornamental end cast bronze tablet is shown by the illustration, 1037, which is generally used for door markers in hospitals, schools, institutions and public buildings. The standard size is 14"x2", but any size can be made to order.

Style 1032

This style illustrates the type of cast bronze tablets used for desks and door plates. The usual sizes are 10"x2 $\frac{1}{2}$ " and 12"x4". The cost depends on the number of lines of letters and the size.

Style 1034

The above photograph illustrates a single line border plate using standard pattern letters for small sizes of door and desk plates. The sizes generally are 6"x1 $\frac{1}{2}$ " to 10"x2".

Style 1031

Bronze tablets can be cast in any shape and with almost any style of letters. The cost depends on the size, shape, inscription and quantity.

RAISED CAST LETTER SIGNS

The following illustrations, 1040, 1041 and 1042 show the latitude that can be had by using various combinations of metals. When only a few letters are required and the area of the tablet is more than six square feet, the cost is usually less than for solid cast bronze.

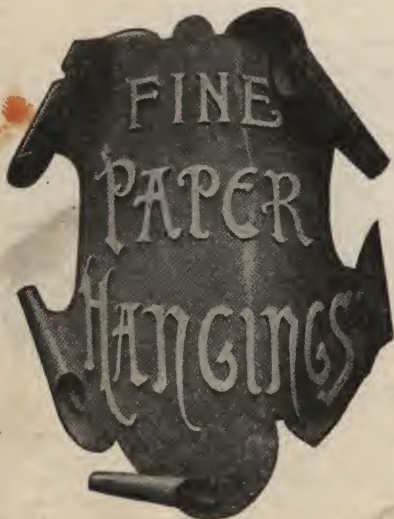

Style 1042

This tablet illustrates cast copper letters attached to Armco (rust resisting) iron. The border is also cast copper. The bracket and hangers are constructed of wrought iron, thus affording a very rugged construction.

Style 1041

Style 1040

Very distinctive tablets can be constructed with the use of cast bronze letters attached to highly polished sheet copper. If the copper background is not kept polished, it will usually tarnish to a beautiful verdi green or oxidize a soft black color. Hammered copper is often used instead of sheet copper.

STAMPED METAL LETTERS & FIGURES

STAMPED ALUMINUM LETTERS

De Vinne Style

May be used for many purposes—Tacked to velvet or plush covered baseboards; wired to woven wire fences, for lettering wagons, sign boards, wire signs and screens, motor boats, farm buildings, barns, etc.

No lower case for 8-in. caps.	

Unless ordered otherwise, stamped aluminum letters and figures are supplied with holes for No. 18 escutcheon pins.

Escutcheon pins are included at above prices.

Stamped Aluminum letters and figures two inch and larger can be punched with holes for screws. If punched with screw holes, they cannot be exchanged or returned for credit.

Round head brass screws for attaching, 7c dozen, 75c per gross.

For board and metal work, where raised letters are required, these aluminum letters and figures finished with gold leaf, make elegant and durable signs. Prices for gilding 9c per upright inch extra.

STAMPED ALUMINUM FIGURES

De Vinne Style

Stamped aluminum figures have been used many years for house numbers, for numbering shelves, storage bins, as stock numbers, etc.

A stock of the two and three inch sizes should be displayed on the stock shelves of every hardware store. Many thousand of these figures are sold every year for house numbers.

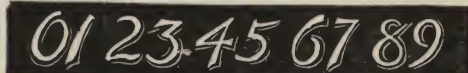

Style 70

	Each	Per 100	Per 1000

State "pointing to the right or the left," when ordering.

CAST LETTERS AND FIGURES

Letters and figures may be cast in iron, bronze, brass, copper, lead etc. Each metal has its own particular uses. Cast bronze is in greater demand than all of the other metals, because it does not rust and if allowed to tarnish, assumes a beautiful green color called verdi green.

CAST BRASS FIGURES

Flat Face Roman

Cast in solid brass, not plated, can never rust.

Used for house numbers; for numbering stock shelves; imbedding in concrete, etc.

For boat registry numbers, this style, because of its legibility, cannot be beaten.

For letters to match see style 89.

Style 88

†6 inch-----	1.00	90.00

*May be made to order with spurs in quantities of 100 assorted figures.

†Made to order only, with spurs or screw holes and cannot be exchanged or returned for credit. Brass screws for attaching, 7c per dozen, 75c per gross.

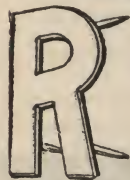

For 5-16 and ½ inch, see style 110 listed below.

CAST BRONZE LETTERS AND FIGURES

With spurs on back

Cast bronze letters can be made in any size, one inch and larger and any style. They can be cast from ½ inch thick to any desired thickness.

For setting in walks, concrete, etc.

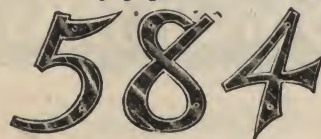

Style 81

Prices quoted on application. State reading matter, size, style and thickness and send a rough sketch of the cross section showing the face. It is also a good plan to state the method of use as this information will indicate the required finish.

CAST, BRASS & OXIDIZED COPPER FIGURES

Not Plated cast iron, cannot rust

A very popular house number. The oxidized

Style 84

copper figures match the hardware used in Colonial, Spanish or Old English types of homes.

Size	Each	Hundred
3 inch Cast brass-----	\$0.20	\$15.00
3 inch Cast oxidized copper -	.20	15.00
4 inch Cast brass-----	.25	20.00
4 inch Cast oxidized copper -	.30	22.00

Special prices on quantities, 250 figures or more of one size and finish.

Screws for attaching, 7c dozen, 75c gross.

CAST BRASS LETTERS

Flat Face Roman

Cast in solid brass, not plated, will never rust.

For imbedding in concrete, for attaching to harness, leather goods, trunks, grips with rivets.

For lettering cabinets, stock shelves, etc.

This style is recommended for boat names and registry numbers because they match the fittings and cannot be harmed by the action of fresh or salt water.

Style 89

Size	Each	Hundred
¾ inch, with supr-----	\$0.12	\$10.00
1 inch, with spurs-----	.13	11.00

*3 inch, with screw holes--	.30	26.00
†4 inch-----	.60	50.00
†6 inch-----	1.00	90.00

Periods, commas and dashes, ½ price of letters.

Brass screws for attaching, 7c per dozen, 75c per gross.

*The 2, 2½ and 3 inch can be made to order with spurs instead of screw holes, in quantities of one hundred or more assorted letters.

†The 4 and 6 inch are made to order only with spurs or screw holes and cannot be exchanged or returned for credit.

For figures, see style 88, listed in left hand column of this page.

For 5-16 and ½ inch cast brass letters, see style 110 listed below.

CAST AND STAMPED BRASS LETTERS AND FIGURES

For initialing hand bags, vanity cases, etc. For lettering uniforms, caps, etc. For labeling cabinets, shelves, etc.

Style 110

The illustrations are full size.

This style has soft brass pins on the back which may be inserted through cloth and clinched on the under side.

The 5-16 and ½ inch are die cast, consequently they are very uniform in size and the edges are smooth.

Size	Each	Fifty	Hundred

¾ inch Stamped brass Old English letters-----	.12	5.00	9.00

For larger sizes of cast brass letter and figures see styles 88 and 89 above.

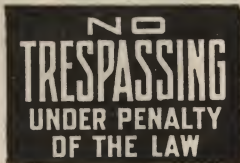

"LITHO" SIGNS

Many states and cities have laws and ordinances stating that proper cautioning signs be used. Many dollars of losses could have been saved if the proper warning signs had been posted in conspicuous places so that they could have been readily seen by workmen and visitors in factories, storage yards, etc.

"LITHO" signs are made of various weights of iron, usually No. 30 gauge. The letters on most of the signs are embossed which stiffens the signs as well as increasing their legibility.

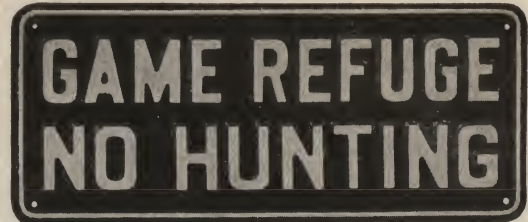

Several of the various styles of "LITHO" signs are made with different inscriptions. The various inscriptions are shown below the illustrations. When ordering, be sure to state the style number and inscription.

If the sign you desire is not listed, write us as we are constantly making additions to our list. Remember our slogan, "IF IT IS A STOCK SIGN, WE HAVE IT."

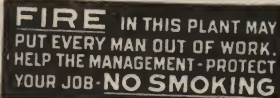

Style 506, 14"x9 1/4"
Embossed white letters, blue ground.

Section 24 of chapter 61 of the Illinois Revised Statutes expressly makes it unlawful to hunt on lands where notices are posted in conspicuous places forbidding trespassing.

Style 534 16"x6 1/2". No 24 gauge iron—extra heavy. Embossed white letters, black ground

Style 505 20"x7"
Embossed white letters, red ground.

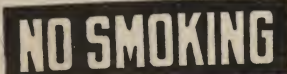

Due to the strong personal message to employees, these signs exert a strong influence against carelessness.

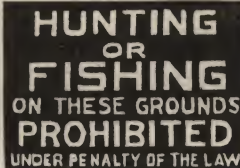

Style 553 12"x8"
Embossed white letters, blue ground.

Style 516 14"x10"
8" white letters, red ground.
For glass EXIT signs, see page fifty-nine, style 105.

Style 536 - 14"x4"
Embossed white letters, red ground

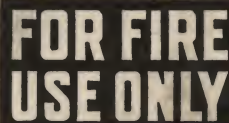

Style 512 14"x10"
White letters, blue ground.
Section 24 of chapter 61 of the Illinois Revised Statutes expressly makes it unlawful to hunt on lands where notice are posted in conspicuous places.

Other states have similar laws but even if your state does not, the psychological effect of these signs will usually obtain the desired result.

Style 511 - 20"x7"
White letters, red ground

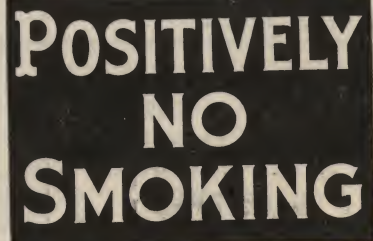

Style 539 14"x8"
Embossed white letters, red ground

Fortunes would be saved if fire buckets and extinguishers were not tampered with or misused by thoughtless persons. These warning signs may save you many dollars if posted in the proper places.

Style 510 - 14"x10"
The word "DANGER" is embossed white letters on red panel. The balance of the inscriptions are blue letters on white panel. The background is blue.

Danger, Look Out For Cars
Danger, Gasoline
Danger, No Smoking, Matches
Or Open Lights
Danger, No Trespassing
Danger, Keep Off
Danger, No Admittance
Danger, Hands Off
Danger, Go Slow

Style 515 20"x14"
White letters, blue ground

Style 514 - 19 1/2"x7"
White letters, red ground

"LITHO" SIGNS—Continued.

EXIT

Style 548 10"x7"

6" Embossed red letters

Will comply with most state and city ordinances.

See page fifty-six, style 105 for glass EXIT signs.

FIRE ESCAPE

Style 547, 19"x5", No. 36 gauge iron

4" Embossed white letters, red ground, with index pointing to the left or right.

FIRE ESCAPE

Style 549 20"x7"

6" Embossed red letters on white ground.

Will comply with most state and city ordinances.

See page fifty-six, style 106 for glass FIRE ESCAPE signs.

THIS WAY OUT

Style 507 14"x4"

Embossed white letters, blue ground.

TWO LINE BOOSTER PLATES

Style 551 12"x3½"

City name and slogan, embossed letters and border in colors to match state license plates.

Minimum quantity, 100 plates alike, complete with clips for attaching to license plate ----- \$18.00

“LITHO” SIGNS—Continued.

The traffic congestion of cities is becoming a serious condition and only by the judicious use of signs can the traffic be handled expeditiously.

The larger cities have proven the worth of traffic signs, but the usual electrically operated signs are too expensive and costly for small municipalities. The following traffic signs are designed to meet the necessity of inexpensive indicators and warnings for the prevention of accidents and traffic jams.

Style 529 White letters on red ground.

Double face signs (signs reading from both sides) can be made by attaching two single face signs back to back and suspending them from a bracket. Page 59 for brackets and hanging equipment.

548	.45	4.50	12.50	22.50	1 to 5 signs, 3 lbs.
549	.60	6.00	17.35	31.50	1 to 5 signs, 3 lbs.
553	.60	6.00	20.30	35.80	1 to 5 signs, 3 lbs.
554	.35	2.60	10.00	18.00	1 to 5 signs, 2 lbs.

It is not necessary to order twelve, fifty or one hundred signs alike to obtain the quantity price. The quantity may be assorted in as many different styles as desired except in the case of special Booster plates which are made to order.

CHECK THE ENTIRE LIST of stock inscriptions on pages thirty-eight to forty-two inclusive—You may have overlooked one or more necessary items.

If you desire to have your order shipped by parcel post, include a sufficient amount in your remittance to cover the postage charges. If you remit too much, the balance will be refunded immediately after your order is shipped.

PLATE GLASS HOUSE NUMBERS

Chipped edges, brass backed

The edges of the plate glass are chipped and finished in silver. The glass is set in a brass back which serves the double purpose of strengthening the plate and affording a means of attaching it with out the necessity of drilling holes in the glass.

2½ or three inch plain silver or embossed silver figures on black ground.

Size	Number of figures	Size of figures	Plain silver	Embossed silver
3x 8 inches	4 or less	2½"	\$1.20	\$1.40
3x12 inches	5 or 6	2½"	1.80	2.20
4x 8 inches	3	3"	1.60	1.90
4x10 inches	4	3"	2.00	2.40
4x12 inches	5	3"	2.25	2.80

Shipping weight, three pounds

Style 200

PLATE GLASS HOUSE NUMBERS

Chipped Edge, Brass Backed

This style is only made with 2½ inch figures.

This style is made the same as style 200 except words "Delivered in Rear" or the owner's name included.

Style 201

Size	Plain Silver	Embossed Silver
4x 8 inches, 4 figures	\$1.70	\$1.95
4x12 inches, 5 or 6 figures	2.40	2.80

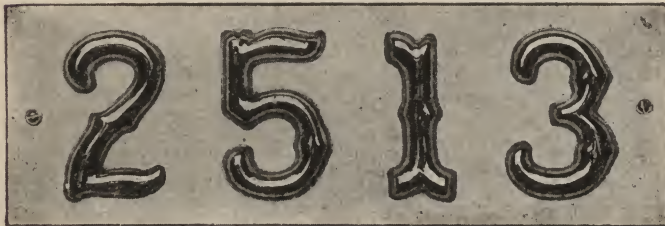

State "DELIVER IN REAR" or owner's name when ordering.

Shipping weight, three pounds

GLASS NUMBER PLATES

Vitrolite Glass-Convex Gold Glass Figures

The cut below illustrates the white or black vitrolite plate glass to which three inch convex gold glass figures, style 43, described on page six are attached. The brilliant gold figures offer a pleasing contrast against the white or black glass. These plates will never tranish or change color. They require no polishing and will not deface the finest wood work.

Style 53

	White Plate	Black Plate
4"x7" 2 figures	\$2.00	\$2.25
4"x9" 3 figures	2.25	2.50
4"x12" 4 figures	2.50	2.75

Complete with brass screws.

See Pages Two, Four, Six, Seven, Twelve, Twenty-three, Thirty-five, Thirty-six and Thirty-seven for Enamel, Glass, Foil and Metal House Numbers.

These plates are made of plate glass with brass backs fitted into the chipped edges. The letters are either gold or embossed silver.

Style 203, Size 3x8 inches

Silver letters each	\$1.25
Gold letters, each	1.50

Shipping weight, one plate, three pounds.

This style is also made with gold or silver letters reading:

**BEGGARS, PEDDLERS
& CANVASSERS
NOT ALLOWED**

INTERLOCKING NUMBER PLATES

Chipped Edge, Brass Backed

Because of the interlocking device, this style of number plate is very popular. Any house number can be rapidly assembled and attached with only two screws.

The gold figures on black ground are very legible.

Style 210

Size 2"x2¾" Each \$0.30

½"x4" Round head brass screws for attaching 7c dozen, 75c gross.

Put up in dealer display boxes of 100 figures and dashes, per hundred \$22.50

Standard assortment contains: ten each, figures, 1, 2, 3, 4, 5, 7, 8, 0; nine each, 6, 9, and two —. The dashes are used to form double street numbers, viz, 2649-50.

See Pages Twenty-three, Twenty-nine and Fifty-six for Enamel, Brass and Transfer "Deliver Goods in Rear" Plates.

FRAMED GLASS SIGNS

Double strength glass mounted in metal covered frames.

By the use of a mechanical process, we are able to supply glass signs at a very low cost. These signs are lettered in silver or gold with the use of standard pattern letters, either Roman or Gothic styles.

Framed glass signs can be made with any inscription in either gold or silver letters and black background.

To obtain the cost of this style of signs, it is necessary to compute the cost of the frame as stated on page twenty-three.

To the price of the frame, are added the cost of the glass and letters.

Glass, \$1.00 per square foot.

Letters, 10c per upright inch., i.e., two inch letters cost 20c each; three inch, 30c each.

Letters, one inch and smaller, cost 10c each.

Minimum charge, one sign, \$6.00

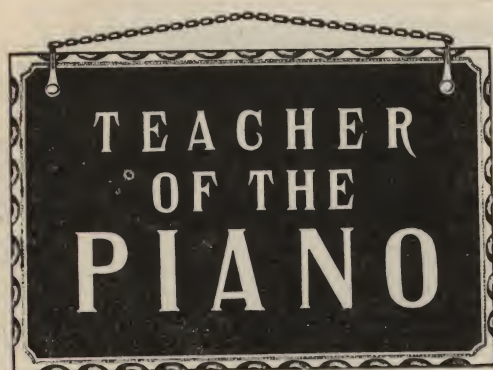

When ordering state the approximate sizes of letters desired and the kind of moulding.

Style 205

WINDOW SIGNS

Chipped edge plate glass

Style 204

Chipped edge plate glass window signs can be made with any inscription in either gold or silver letters and borders and black background.

Complete with chain ready to hang.

One, two or three lines of letters.

	Silver Letters	Gold Letters
16x 8 in. or smaller -----	\$8.00	\$ 9.50
10x14 to 10x16 inches -----	9.00	10.50
12x20 to 12x24 inches -----	12.00	14.50

The above prices are for standard pattern letters, either Roman or Gothic. Prices on signs with special styles of letters quoted on application.

CHIPPED EDGE

Plate Glass, Brass Backed

Style 206

Size	Silver Letters Each	Gold Letters Each
2x3 inches -----	\$0.80	\$0.95

Shipping weight: one pound

CHIPPED EDGE Plate Glass, Brass Backed

Style 207

	Silver Letters Each	Gold Letters Each
2x3 inches -----	\$0.80	\$0.95
2x5 inches -----	1.00	1.20

Shipping weight: one pound

See pages twenty-one, twenty-two and twenty-nine for enamel and brass PUSH and PULL plates.

GLASS NAME PLATES

Chipped Edge—Brass Backed

By the use of a mechanical process, we are able to supply glass name plates with gold or silver letters at a very low cost.

As these plates are not lettered by hand, only Gothic and Roman styles of letters are used.

Size	Number of letters per line	Silver Letters	Gold Letters	Shipping Weight
3x 8 inches.....	11.....	\$1.50	\$2.30	3 pounds
3x12 inches.....	16.....	2.30	3.40	4 pounds
4x 8 inches.....	11.....	1.90	2.60	4 pounds
4x10 inches.....	14.....	3.00	3.50	5 pounds
4x12 inches.....	16.....	3.50	3.90	5 pounds
4x16 inches.....	18.....	4.75	5.75	6 pounds
4x18 inches.....	22.....	5.00	6.00	8 pounds

The above prices are for plates with one or two lines of lettering. Add 50% for three lines, i. e., a plate, size 4x10 inches, with three lines of gold letters, will cost \$5.25.

Style 202

BEVELED EDGE GLASS NAME PLATES

Gold letters and border — black ground

By the use of a special process, we are able to supply glass name plates at a cost far less than was necessary for hand lettered plates, without sacrificing any of the durability or attractiveness.

Size	Each
Size 10"x2½" one or two lines of letters with out wood block.....	\$2.75
10"x2½" one or two lines of letters with desk block, finished in oak or mahogany.....	3.75

Style 102

GLASS SIGNS

With Brass Clips and Chain, Ready to hang

Very attractive and legible signs can be made by cementing any of the styles of enamel or glass letters listed on pages two, four, six and nine to plate glass, either beveled or plain or to double strength glass. These signs are furnished complete with hangers, chain, hooks and screw eyes ready to hang.

Very novel signs can be made by cementing any of the various styles of glass letters to black, white, Jade or ivory vitrolite glass. As the colors of both the letters and glass are permanent, these signs cannot wear out, never require polishing and are easily cleaned.

The illustration is a photograph of a 24"x6" beveled edge plate glass sign lettered with three inch plain, convex glass letters, style 42 listed on page six. The cost of the complete sign is only \$8.85. The cost of other styles and sizes in proportion. State the size of either the sign or the window in which it is to be hung, the inscription, the style and size of letters and the kind of glass.

Style 103

CHIPPED GLASS SIGNS

Chipped glass signs are the most attractive signs that can be made. Either the letters or background can be chipped and finished in gold or silver. The plate glass can be supplied either beveled or not beveled, and drilled for hanging or framed for attaching to the fronts of buildings.

Style 104

CHIPPED GLASS SIGNS mounted in metal cover moulding frames make beautiful and durable signs.

The silver and gold chipping reflects light at all angles.

Prices quoted on application: State size, colors, inscription and whether the signs are to be framed or equipped with hangers and chain for hanging in windows.

GLASS NAME PLATES

Convex Glass

The frame of this style is made of heavy moulded glass, mirrored on the edges in gold. The letters are black on white vitrolite glass.

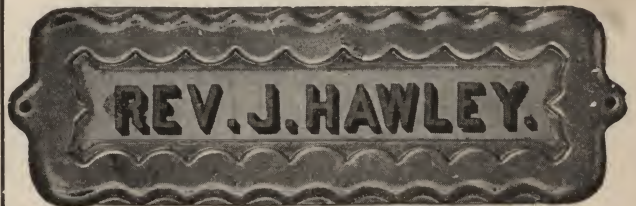

Style 109 Size 2½x8½ inches

With screws and washers, each-----\$1.75

See pages twenty-one and thirty for enamel and brass name plates.

STAMPED ALUMINUM FRAMES

Blank frames only, not lettered

Size 3½"x10", outside measurement

Sign men can add materially to their income by keeping a stock of these frames on hand and inserting lettered glass plates as required. The glass plates are cemented in the frames with the same cement that is used to attach enamel and glass letters. Cement is listed on page eleven.

	Each	Dozen
FRAMES ONLY—NO GLASS	\$0.75	\$5.00
Shipping weight, one to five plates, one pound		
Brass screws for attaching, 7c dozen, 75c gross.		

STEEL STENCILS

For many years, there has been a demand for stencils that were stronger than those made of brass. By the use of a new process we are now able to supply stencils made of steel. They are much more durable and cost no more than brass. In many instances, such as trade marks, special designs, signatures, etc., the first cost of steel stencils is less than brass. In all cases, the final cost of steel stencils is less than brass because they wear longer.

Styles 101A to 101H illustrate a few of the many styles of STEEL STENCILS that can be supplied at the following prices.

When ordering, state either the size or space available or the overall size of the stencil. Also state the approximate sizes or importance of the various lines. It will help us to fill your order exactly as required if you will send a rough sketch.

ADJUSTABLE STENCIL LETTERS & FIGURES

These stencils are made with locks on the edges. They can be quickly and easily joined together to stencil any word or name and may be taken apart and rejoined together to spell any other word. Adjustable stencils can be used continually for many years.

The $\frac{1}{2}$ inch to $2\frac{1}{2}$ inch are made of brass in the Roman style only. The three inch to eight inch sizes are made of steel in either Roman or Gothic styles.

Style 100

LETTERS

Complete sets contain, one of each letter, "A" to "&", period and comma and two end pieces.

Size	Roman Set	*Roman Each

Shipping weight— $\frac{1}{2}$ inch to $2\frac{1}{2}$ inch, 2 pounds; three to five inch, three pounds; six to eight inch, four pounds.

*Due to cost of handling, no order can be shipped for less than 25c. To offset this minimum charge, combine orders for odd stencil letters and figures with other merchandise.

See pages forty-eight, forty-nine and fifty-one for steel stencils, stencil brushes and stencil ink.

Kindly include a sufficient amount in your remittance to cover parcel post charges. If any balance remains after shipping, it will be refunded with our invoice.

DRY STENCIL INK

Dry stencil ink is very convenient as it cannot spill or become "muddy" and is always ready to use.

Style 97

With the use of dry stencil ink and the adjustable stencils listed on page fifty, announcements, signs and show cards can be easily and quickly made.

For economy we have listed the cakes of ink and containers separately. The containers can be refilled with a cake of dry stencil ink. Further economy can be had by ordering a dozen cakes of ink with one container. Each container is complete with sponge with the exception of size number 97C. This size is sold only with can and without sponge.

Colors—Blue, white, red, brown, green, yellow, orange, and black.

No.	Dia- meter	Height	Black		Colors		Container & sponge
			Each	Doz.	Each	Doz.

3021B	¾ inch	.33
3021C	1 inch	.33
3021D	1½ inch	.40

LINEN MARKING STENCILS

Linen Marking Stencils are used for the rapid marking of towels, bedding, uniforms, linen, etc., in schools, hotels, public buildings and institutions.

The stencils are fitted over metal frames which prevent the brush from soiling the articles while marking.

The outfit consists of one stencil as illustrated, a supply of indelible ink and a brush. Additional ink and brushes may be purchased at any time without stencils.

Thousands of impressions can be made with one stencil.

Made in the Following Styles of Lettering, Illustrations are full size.

Size	Quantity	Size	Quantity
½ inch	250	2 inch	220
1½ inch	250	3 inch	160

The ½ inch letters cover one bar. 1-1/2 inch letters cover two bars. 2 inch letters cover three bars, and 3 inch letters cover four bars. The letters are white on black ground.

CHANGEABLE SIGNS FOR OUTDOOR USE

Oak Cabinets with removable sign sections and hinged glass doors complete with lock. These beautiful bulletins are very ruggedly constructed and stand many years of hard use. The sign sections are removable thus permitting the changes of inscriptions to be made indoors.

The boards may be attached flat against the wall or mounted in the lawn on four by four inch posts.

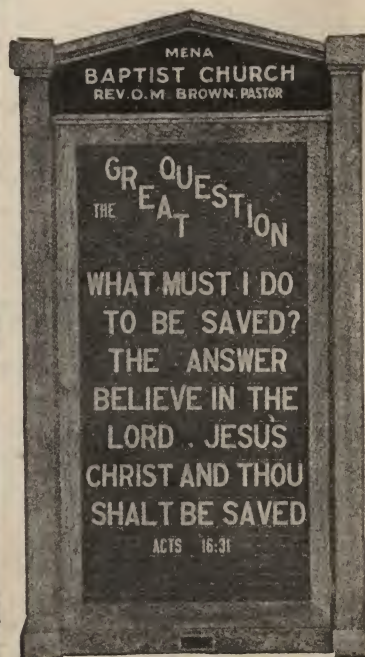

Styles 302 and 303

The REV. KYLE MODEL, Style 303, is a DAY and NIGHT Bulletin. The name of your Pastor, Church and the bulletin can be read NIGHT or DAY. This style is wired on the inside, ready to connect to your regular lighting service.

Style 304

Style 305

Overall Size	Letter and Figure Equipment	Price

When ordering state which "Eyes" are desired, right or left. The illustration is a right eye.

See page eight for Convex Glass Eye Signs.

REX METAL POLISH

To keep metal signs in good condition, it is necessary to use a polish that does not contain acid or coarse abrasives. After testing thoroughly many kinds of polish, we selected REX metal polish because of the ease with which it enables the user to polish badly tarnished metals of all kinds.

All hand polishing done by our workmen is with REX.

REX METAL POLISH contains no acid or

No. 146

coarse abrasives. It will polish metal like new and will not injure hands or clothing.

COLOR MIXING GUIDE

For Painters, Decorators, Show-Card Writers, Artists, Art Instructors, Students, Pressmen, Assistants, Photo-Engravers, Lithographers, and School Children.

"Color Mixing Guide" is just as necessary as the Printing Press or Painter's Brush.

Nature furnishes yellow, red and blue; "Color Mixing Guide" shows how to obtain all known colors and tints from them.

To obtain a certain shade requires certain proportions of the different colors. The only difference is in the mordant or fixer which holds the pigments together on the different surfaces to be painted.

Handy 1,000 colors may be obtained from Pint can, black and white.

MASTER LETTERING KEYS

This unique invention enables anyone to design and letter show cards, signs and posters without training.

With a little practice anyone can draw more than fifty sizes and styles of letters and numbers.

More than 80% of the various styles of English letters can be reproduced with one of these "KEYS."

The twenty page book of instructions, included with every order, enables anyone with a slight amount of practice to lay out sign work.

The one, 1½ and two inch sizes, stamped from heavy aluminum, are sold only in sets, packed in a neat leather case.

The three inch size made of heavy aluminum is sold separately or with the set of three small sizes.

Larger sizes: four, five, six, eight, ten and twelve inch sizes which are made of laminated wood, 1-8 inch thick, are sold separately or in a complete set of six.

Vest pocket leather case containing 1, 1½ and 2 inch instruments.

HARRISON'S CUTTERS AND FITCHES

Vulcanized in Rubber

Harrison's Cutters and Fitches are noted for their fine working qualities and long life. They have been popular with the sign craft for years and are used by the best men in the country.

If you have never used them, give them a trial and we are confident that you will continue to use HARRISON'S CUTTERS AND FITCHES.

HARRISON'S WHITE LETTERING FITCH

Vulcanized in Rubber

Style 3000

The finest Fitch made. Especially designed for bulletin work. Made of White French Bristle with a long chisel, beautifully shaped to a clean sharp edge.

Size	Length Out	Each	Dozen
1/4"	1 3/8"	\$.40	\$4.20
1/2"	1 3/8"	.53	5.60
3/4"	1 3/8"	.67	6.72
1 "	1 1/8"	.87	8.40
1 1/4"	1 3/8"	1.13	11.20

HARRISON'S SUPER WHITE FITCH

Vulcanized in Rubber

This Fitch has more stock—is "Longer Out"—and the chisel is not quite as deep as the White Lettering Fitch.

A high grade brush for both bulletin and wall work that will hold its edge and give long service.

Style 3001

Width	Length	Each	Dozen

The Commonwealth Edison Company has offered constant rate reduction from time to time since 1886 and because of these voluntary reductions you are able to purchase nearly five times as much electrical energy for one dollar as you could in 1886. In addition to this saving, the lamp manufacturers have increased the efficiency of the electric light bulbs to such an extent that the lamp you use today furnishes nearly seven times as much light for the same amount of electricity as the lamp of 1886.

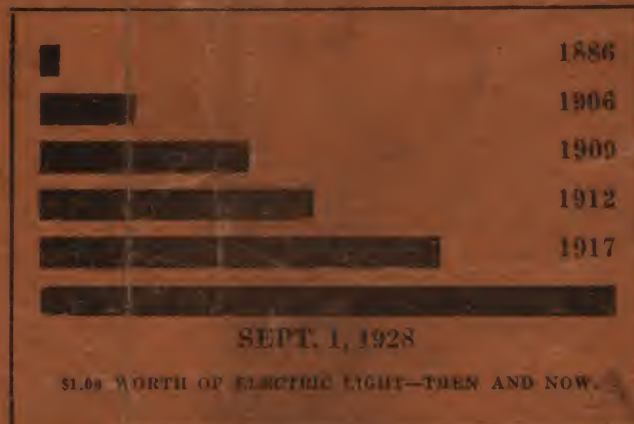

Considering these two combined savings we find that the merchant of today receives thirty-two and one-half times as much electric light for his dollar as did the merchant of 1886.

In addition to this, the life of the lamp has been increased to the extent that a lamp now lasts five times as many hours as it formerly did.

As a result of this great reduction in the cost of electric light the merchant of today finds this a most economical means of advertising and sales building.

Remember that less than 4 cents will buy as much light today as one dollar would thirty-two years ago. While less than 5 cents will buy as much electric light for your sign and store as one dollar would 20 years ago and less than 68 cents will buy as much as one dollar would 10 years ago.
